Presidents Report:

D Treloar summarised the key achievements of the Conjola Community Association in the past 12 months. The key points are:-

1. Dredging – The main objective of dredging, to provide sustainable navigable channel from the Cunjurong Boat Ramp into the main body of the Lake has not been achieved. However, since dredging has been completed there has been no flooding or inundation despite several significant rainfall occurrences. A detailed analysis of similar rainfall occurrences prior to dredging did result in flooding, which indicates that dredging has contributed to safety and protection of property from flooding. The analysis was included in a review submitted to Council for consideration in November 2017. Future efforts by the Conjola Community will include liaison with the communities of Manyana and Cunjurong both of which are concerned with erosion from the beaches
2. Boardwalk – Despite several unplanned challenges/variation to the original plan, the replacement of the treated timber pine boardwalk with a composite and stainless steel structure was completed in Feb 2018. The new boardwalk complies with relevant safety, disability, and emergency access standards, and was delivered under budget.
3. Havilland St Boat Ramp (Regional Boat Ramp) – Although the new boat ramp is regarded by Council to be “shovel ready”, and remains the #1 priority RMS for Conjola, funding for the \$1.9m has not been forthcoming. NSW Boating Now Round 2 grants offered \$400,000, however, Council required the full amount of funds required for completion should be available, and will submit a request for further funding. In the meantime, a Council Meeting in Feb 2018 carried a motion for the Council General Manager to seek approval from Boating Now to redirect the \$400,000 to 2 other high priority projects
